

Data and AI Consultant

We offer

Working on challenging projects based on cutting-edge technologies

Become a key person in a small structure promoting teamwork and exchange

Who we are?

We are a growing start-up company based in Brussels that offers its employees:

- Opportunities to learn new technologies in Artificial Intelligence, Data Analytics, Business Intelligence.
- Flexibility in the work (telework, flexible working hours, ...).
- A lot of diversity in the job.
- An attractive remuneration package.
- Possibility to enter the capital of the company as shareholder after proof period.

Lantana is an open-minded company passionate about technology and promoting real teamwork and collaboration between people. We are taking care of our clients and employees alike.

The position

We are looking for a Data Consultant. The person will be working on Data centric projects for our customers and will not only oversee the design and implementation of the technical solution but also analyse their needs by working closely with our customers.

- We offer the possibility to continuously learn new things in the digital technology trends.
- We also offer the possibility to take an active role in the leading of the company.

Requirements

- We are looking for a candidate with 3+ years of experience as Data Engineer, who has attained a Graduate degree in Computer Science, Statistics, Informatics, Information Systems, or another quantitative field.
- Technical experience using one or more of the following software/tools is an asset:
 - Knowledge of Cloud based environments and in particular Microsoft Azure
 - Experience in Data engineering and processing tools. A knowledge of Microsoft's Azure Synapse or Azure Data factory is not mandatory but is a plus
 - Master at least one programming language like Python, Spark or R
 - Datawarehouse concepts
 - Knowledge of SQL and relational databases and if possible, also non-relational data repositories or datalakes
 - The knowledge of basic machine learning tools and techniques is a plus.
 - Preferably one data visualization tool like Power BI or Tableau
- Good communication skills (minimum 2 of the 3 languages EN, FR, NL)

Responsibilities

- You will oversee the definition and elaboration of data centric solutions for one or many of our customers.

Why Should You Apply?

- Become a key person in a growing company
- Learn and stay up to date regarding the latest AI and BI trends and technologies
- Participate in a human adventure experience

The location

Our offices are located in Brussels, very close to public transportation but remote work is possible and even promoted when possible.
